

NFD - Bug #1680

Multiple faces created for the same endpoint

06/19/2014 11:51 AM - Alex Afanasyev

Status:	Closed	Start date:	06/19/2014
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Faces	Estimated time:	0.00 hour
Target version:	v0.2		
Description			
When multiple "create" requests are issued back to back (before the first one is processed), NFD will process both requests and create duplicate Face entries.			
Steps to reproduce:			
- start NFD			
- run the following command:			
<pre>(nfdc create tcp4://sirius.cs.memphis.edu &); nfdc create tcp4://sirius.cs.memphis.edu</pre>			
Expected result: only one face tcp4://141.225.8.95:6363 created			
Actual: two faces for tcp4://141.225.8.95:6363 are created
