

ndnSIM - Task #2369

Write unit-tests

01/10/2015 12:14 AM - Alex Afanasyev

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Yuanzhi Gao	% Done:	100%
Category:	tests	Estimated time:	0.00 hour
Target version:	2.1		
Description			
Currently, ndnSIM doesn't have a single unit test. However, some functionality is actually tested in the examples.			
This is a major task that includes writing unit tests for all the code, except base NFD codebase (ndnSIM specific modifications of NFD still should be covered by the unit tests).			
Unit tests should use Boost.Test framework

Hi Spyros and Alex,

I have played with some of the existing tests cases for ndn-cxx, trying to get familiar with how the test cases should look like. I have a question that what functionalities in ndnSIM should my test cases test on? Could you give me any reference that I can look into?

Thank you very much.

#4 - 03/05/2015 09:27 AM - Spyros Mastorakis

Yuanzhi, any progress with that?

Hi Spyros, sadly not too much progress this week. I am still working on the gerrit tutorial so far. A lot of coursework and projects near finals week. But I'll catch up later this week.

Thank you.
