

ndnSIM - Feature #3123

New home for ndnSIM-related repositories

08/21/2015 06:04 PM - Alex Afanasyev

Status:	Closed	Start date:	08/21/2015
Priority:	Normal	Due date:	
Assignee:	Alex Afanasyev	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	2.1		
Description			
Official repositories for all ndnSIM-related code is now moved under umbrella of named-data-ndnSIM organization on GitHub.			
This change needs to get reflected in the documentation and CI scripts.			

History

#1 - 08/22/2015 08:43 PM - Junxiao Shi

How about renaming the organization to just 'ndnSIM', if it's not taken?

#2 - 08/23/2015 06:38 PM - Alex Afanasyev

I would like to keep strong association with named-data organization.

#3 - 08/24/2015 03:31 AM - Christian Kreuzberger

I assume this means that all developers/users have to adapt their repositories and dependencies to the new links?

Also, with these new names in place, will there be a system that tells me which versions of ndn-cxx/NFD/ndnSIM are compatible (e.g., if ndn-cxx gets updated).

Or can I assume that IF it is under this new repository name, it will always be consistent and compatible?

#4 - 08/24/2015 10:01 AM - Alex Afanasyev

I will keep mirrors of repositories in old locations.

The new locations are specifically made for submodule integration of ndn-cxx and NFD into ndnSIM. So, this would significantly simplify issue with version compatibility, as there will be no moving parts unless there is an explicit update of ndnSIM.

I will try to keep documentation of what is the current base version of NFD/ndn-cxx as part of commit log and will create a changelog for that.
