

mini-ndn - Task #3468

Use /usr/local/etc/ndn/nfd.conf by default

02/19/2016 08:19 AM - Vince Lehman

Status:	Closed	Start date:	02/19/2016
Priority:	Normal	Due date:	
Assignee:	Ashlesh Gawande	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	v0.2.0		
Description			
Currently, Mini-NDN uses /usr/local/etc/ndn/nfd.conf.sample as a template when it creates NFD configuration files.			
Instead, Mini-NDN should check if /usr/local/etc/ndn/nfd.conf exists and if so, use it as the template.			
Since /usr/local/etc/ndn/nfd.confis not installed automatically, Mini-NDN should use /usr/local/etc/ndn/nfd.conf.sample as a backup in case it does not exist.			
Mini-NDN copies the configuration file in bin/minindn			

History

#1 - 03/29/2016 03:29 PM - Vince Lehman

- Description updated
- Assignee set to Yucheng Zhang

#2 - 04/05/2016 11:54 AM - Yucheng Zhang

- % Done changed from 0 to 90

Have pushed the changes to gerrit.

#3 - 07/18/2016 10:16 AM - Ashlesh Gawande

- Status changed from New to In Progress
- Assignee changed from Yucheng Zhang to Ashlesh Gawande
- Target version set to v0.2.0

#4 - 07/26/2016 01:42 PM - Ashlesh Gawande

- % Done changed from 90 to 100

#5 - 07/26/2016 01:42 PM - Ashlesh Gawande

- Status changed from In Progress to Closed
