<b>Target version:</b>	v0.8		
<b>Description</b>			
<p><a href="#">CsMgmt</a> cs/erase imposes an upper bound on the number of CS entries that can be erased, to ensure the command finishes in a reasonable amount of time and does not block the forwarder.</p> <p>nfdc cs erase command currently directly maps to cs/erase. Consequently, if an operator desires to erase a large number of entries, they have to run the command multiple times.</p> <p>Ideally, nfdc cs erase should invoke cs/erase in a loop until either the specified count is reached or there are no more entries under the specified prefix.</p>			

### History

**#1 - 09/25/2018 02:56 PM - Davide Pesavento**

- Description updated

**#2 - 04/17/2020 11:24 AM - Eric Newberry**

- Assignee set to Eric Newberry

**#3 - 04/18/2020 05:01 PM - Eric Newberry**

- Status changed from New to Code review

- % Done changed from 0 to 100

**#4 - 04/21/2020 06:27 PM - Davide Pesavento**

- Status changed from Code review to Closed

- Target version set to v0.8
