Target version:	v0.6.0		
Description			
Mini-NDN-Wifi, due to redistributing the Mini-NDN code within its own repository rather than using Mini-NDN's version, is behind on a variety of quality of life and functionality updates made since Mini-NDN-Wifi was spun off into a separate project. For the sake of compatibility and ease of use, it would be wise to bring the two codebases closer together.
