Description I am trying to install the NDNRTC on Ubuntu 18.04. I am not sure if it is supported or no as of now. In the make file I checked that the installation is supported only for Ubuntu 14 and 16. Is there a way to make the NDNRTC available to be installed successfully in Ubuntu18.04? I tried installing it and I am running into the following error: ndn3@ndn3-NUC8i7BEH:~/Desktop/NDN3_root/ndnrtc-env/ndnrtc/cpp\$ make && make install CXXLD libndnrtc.la ar: u' modifier ignored since 'D' is the default (see U') CXXLD frame-fetcher ./libs/libndnrtc.so: undefined reference to 'XOpenDisplay' ./libs/libndnrtc.so: undefined reference to 'XQueryKeymap' ./libs/libndnrtc.so: undefined reference to 'XCloseDisplay' collect2: error: ld returned 1 exit status Makefile:5312: recipe for target 'frame-fetcher' failed make: *** [frame-fetcher] Error 1
